
A
extent (cells)
h = 1/1
h = 1/2
h = 1/4
h = 1/8
propagation criterion
lattice coupling d/h^2
B
front propagated
no front
coupling d
$d/\Delta x^2$
C
original rule
settling rule
upper edge d^*
time step (s)
D
front speed (rows/s)
upper edge, original rule
upper edge, settling rule
lower edge, original rule
distance to edge ε
E
$m\,d_{low}/2$ / axis d_{low}
axis
(1,1)
(3,2)
(2,1)
tri.
(3,1)
front direction
F
lower edge
upper edge (i)
upper edge (ii)
front propagated
coupling d
upper edge not resolved
upper edge not resolved
uniform
δ 0.1
δ 0.2
δ 0.4
∫ 0.25
∫ 0.5
